Ashu Mishra

Senior Product Manager | Fintech Innovation & Digital
Transformation Strategist | AI Evangelist | Orchestrating Payment
Systems Excellence | Expert in Supply Chain Optimisation & Data-
Driven Product Development
Ghaziabad, Uttar Pradesh, India

Summary

Senior Product Manager with 7+ years of experience building and scaling B2B products across fintech, e-commerce, supply chain, and procurement domains — with cross-market exposure across India and Dubai. I specialize in translating complex operational challenges into scalable product solutions. My work spans payment orchestration, catalogue management, ML-powered sales applications, procurement automation, and supply chain optimization — always anchored in data, customer research, and measurable business outcomes. What I've delivered: -> Built a fintech vertical handling #300–400 Cr in monthly invoices with 99.5% payment success rates across 100+ bank integrations and 5 payment gateways-> Unlocked USD 130M + #40 Cr in working capital through intelligent procurement and supply chain automation-> Scaled a catalogue management platform to 1.1M SKUs with semantic search, improving PDP-to-cart conversion-> Drove sales margin improvement from 4.5% to 7.5% through ML-powered recommendations and gamification-> Achieved 90% manpower reduction through automated sales systems while improving UX I bring strong cross-functional leadership — working closely with engineering, data science, operations, and business teams to ship products that create real impact.

Experience

ZIGRAM

Technical Product Manager
July 2025 - Present (10 months)
Gurugram, Haryana, India

Leading AI-Driven Data Product Development | Advanced NLP & Vector
Database Solutions

Architecting and deploying large-scale data processing pipelines for Zigram's core data product, designing optimized schemas for vector and non-relational databases to support real-time AI applications

Building production-grade NLP systems processing 20,000+ news articles daily using advanced Natural Language Processing and Named Entity Recognition (NER) algorithms, creating adversarial press intelligence databases with lightning-fast vector search capabilities (10ms-30sec query response)

Pioneering AI-powered data infrastructure for Politically Exposed Person (PEP) compliance databases, engineering schemas from ground-up to handle 15+ million records while implementing Agentic AI systems for automated web scraping, data extraction, and intelligent structuring

Key Technologies: Vector Databases, NLP, Named Entity Recognition, Agentic AI, Machine Learning Pipelines, Real-time Data Processing, Schema Design

Medikabazaar

Senior Product Manager

January 2024 - July 2025 (1 year 7 months)

Gurugram, Haryana, India

Leading the Seller Management, Fintech, catalogue management and order enrolment charter at Medikabazaar:

Key achievements:

- Created robust systems for annual procurement of USD 130 M+ across 6 business verticals and 2 geographies
- Leading a cross-functional team of 15 professionals driving digital transformation initiatives
- Established fintech vertical with 100+ bank integrations and 5 payment gateways, achieving 99.5% success rates
- Architected end-to-end procurement platform unlocking significant working capital through inventory orchestration
- Engineered comprehensive catalog management platform for 1.1M SKUs with semantic search capabilities, improving conversion metrics
- Developed React Native field sales application processing #200Cr monthly sales

- Implemented ML-driven order enrollment system with automated data mapping, managing #350Cr monthly orders
- Led Tally-OMS integration achieving 100% invoice automation and improved operational efficiency

ElasticRun

3 years 10 months

Senior Product Manager

April 2022 - December 2023 (1 year 9 months)

Pune, Maharashtra, India

In my role as a Senior Product Manager, I have taken the lead in transforming our reverse supply chain, unlocking an impressive 40 crores in working capital by simplifying processes and integrating sustainable technology solutions. My strategy to enhance product visibility for our sales application led to the implementation of innovative features such as the SMART Recommender, SMART Basket, and a Medal Framework for Gamification in mobile apps. These enhancements not only improved our market share but also boosted our margin from 4.5% to 7.5% and increased the number of items per invoice from 7 to 12.

I have also been instrumental in streamlining our logistics processes, applying strategic product management principles that resulted in significant cost reductions, achieving monthly savings of 2 Cr. Collaborative efforts with our Sales Team were crucial in executing promotional and marketing schemes, which generated 35 lakhs of Revenue Growth Management (RGM) from a minimal investment of 1 lakh.

In a pursuit to champion operational efficiency, I implemented a customer-centric automated system within our Sales App, which drastically reduced manpower requirements by 90%, all while enhancing the user experience. My focus on strategic thinking was further underscored by leading the development of a monitoring app for City Managers and Area Sales Managers, enabling them to track crucial KPIs on a daily basis and improving performance metrics by 30%.

One of my key achievements includes designing and rolling out the foundational P&L Ecosystem for Elasticrun. This initiative not only drove profitability across over 20 warehouses but also positioned my team and me to receive the 'Team of the Year' award, recognizing our outstanding

collaboration and performance in establishing and monitoring crucial KPIs alongside our company leadership.

Product Manager

March 2020 - April 2022 (2 years 2 months)

Pune, Maharashtra, India

As a Senior Product Manager, I've streamlined operations and significantly cut costs, leading to the management of a 200 Cr/month revenue stream. My role in automating our sales app reduced manpower by 90% and improved user experience. I developed a KPI monitoring app for real-time data analysis, and my collaborative efforts with cross-functional teams facilitated the early release of 20 Cr in payments, improving our financial efficiency. These strategies increased our monthly EBIDTA by 5%. Additionally, I've successfully managed the Price Comping app, handling over 1000+ daily entries and reducing processing times from 120 to 24 hours, demonstrating my ability to drive both efficiency and profitability.

ElasticRun

Product Management Intern

April 2019 - June 2019 (3 months)

Pune Area, India

During my internship, I dove deep into researching rural markets in Maharashtra, identifying key growth areas. By applying SKU basket analysis and store segmentation, I improved product assortment, which in turn, boosted sales. I also used market potential analytics to strategize new product launches and broaden market reach. To manage excess inventory, I crafted strategic bundling plans across warehouses. My efforts were recognized with a Pre-Placement Offer due to my standout performance.

Eon Electric Ltd.

Engineer (SCM)

February 2015 - May 2017 (2 years 4 months)

Noida Area, India

In this tenure of my career, I successfully managed the procurement of electronic components, collaborating with international suppliers and uniting teams across Sales, R&D, QA, and Finance to ensure inventory efficiency. I also executed key government projects in Uttar Pradesh and Rajasthan, enhancing local infrastructure through strategic energy solutions.

Education

Institute of Management Technology, Ghaziabad
Postgraduate Degree, Marketing · (July 2018 - March 2020)

University of Petroleum and Energy Studies
Bachelor in technology, Mechatronics, Robotics, and Automation
Engineering · (2011 - 2015)
